Controller
Regulation of digital quantization, more convenient operation. This module receiving human detection signal from the sensor, the drive motor, control the motion of the door, the power supply can be applied to the 220 volts, no transformer.

Motor and Transmission Device
Made from high hardness aluminium, can simply cutoff, all the opening width can be adjusted, install with the optimum size

Aluminium Alloy
Made from high hardest aluminium, it has strong bearing capacity

EXCELLENT SEAL

EXCELLENT BONDING

EXCELLENT WEATHERABILITY

Neutral Weatherproof Silicone Sealant

Characteristics:

- Highly elastic and excellent unpermed adhesion to most building excellent materials.
- Long use life, with high resistance to ultraviolet radiation, rainfall, heat and humidity.
- Excellent resistance against temperature extremes, remains flexible within temperature range of -40°C to +100°C
- One part with outstanding weatherability and resistance to again

Major Uses:

- Weatherproof sealing of glass curtain wall.
- Weatherproofing sealing of various metals, aluminum curtain walls and building facades.
- Joint seal of other concrete or plastic constructions.
- A variety of other building and industria uses.

Storage Shelf Life:

Kliff 789 weatherproof silicone sealant should be stored in cool and dry places over the temperature from 0°C to 27°C, under which the shelf life is 12 months from the date of production

Limitations:

- Not suitable for confined or non-ventilated places as weatherproof sealant requires atmospheric moisture to cure.
- Not suitable for wet/frosty surfaces.
- Do not apply with the surfaces that needs to be painted or have continuous contact with water
- Do not apply with the material having surface temperature not between 5°C to 50°C.

General Purpose Silicone Sealant

Characteristics:

- Easy to use, one-part sealant cured quickly, good weather ability.
- One-componet acetic cured, no mixing required.
- Adhesive to metals, glass, glazed, plastic, paint coated surfaces and many building materials.
- Excellent UV, ozone and chemical resistance, unattached by sunlight, rain, snow and temperature extremes

Major Uses:

- For joint filling and window sealing
- For sealing doors glass-related buildings
- For non-oily wood, coated surfaces Aluminum alloy and ceramic tiles etc.

Storage Shelf Life:

Kliff GP should be stored in cool and dry places over the temperature from 0°C to 27°C, under which the shelf life is 12 months from the date of production

Limitations:

- Do not use for curtain wall structural glazing.
- Not suitable for confined or non-ventilated places as it requires atmospheric moisture to cure.
- Not suitable for wet/frosty surfaces.
- Do not apply with the surfaces that needs to be painted or have continuous contact with water
- Do not apply with the material having surface temperature not between 5°C to 50°C.

GLAZING TAPE * Customized size available according to specific order.

Special Feature

Easy to assemble, no drilling, riveting, welding or screw fastening.
 Excellent seal against water, moisture and dust.
 Quick and easy to apply, saves time, labour costs and greater bonding strength.
 Ideal for bonding to a variety of substrates like most metals, glass, plastics, composites and painted surface.

Glazing Double Side Tape

- * Durable, high performance two-sided pressure sensitive acrylic foam tapes.
- * A high strength, clear, UV resistant double-sided film.
- * Has high adhesion and shear strength.
- * Heat and solvent resistant.
- * A good general purpose, permanent glazing tape.

Applications:

- * Bonding glass to metal frames (aluminium panel) in curtain wall systems and commercial windows
- * Attachment of stiffeners and perimeter clips to architectural panels
- * Exterior building cladding

ADHESIVE	Acrylic
ADHESIVE CARRIER	Acrylic Foam
THICKNESS	1.2mm & 2.0 mm
TAPE COLOR	Grey
LINER	Red PE Film
PACKING	100 rolls per cartoon
